A Crane Co. Company

The brand-new **currenza c<sup>2</sup>** Change giver assists in making your vending machine a more reliable and profitable service, optimising the satisfaction of your customers.

### Reliability

- New standard of payout reliability, utilising unique optical sensor system, enhanced 'eclipse-pin' method & minimised friction solution
- Industry leading operating temperature range from -25° to +80°C, for reliable operation in all machine locations, regardless of weather conditions
- Latest NRI validation technology, with patented new sensor system and 40 measurements of coin parameters
- Easy & helpful operation by various display options

### Flexibility

- Human interface options to suit all individual operator requirements
- 6-Tube cassette system, offering:
  - > Acceptance & payout of all the world's circulation coins
  - > Additional maximum capacity of low replenishing coin denominations
  - > Huge range of potential payout configurations
- Longer filling intervals by back-up configurations

### Profitability

- High-speed payout of up to 6 coins/sec.
- **c<sup>2</sup> optimizer** provides field statistical guidance for an optimum set-up of payout configuration & float levels
- **airport** provides real-time knowledge of audit data & vending machines events

### Innovations

- Human interface in 3 versions: Blue, Green and White
- 6-way or 4-way sorting system, 2 manual back-up tubes possible
- Acceptance & payout of all the world's circulation coins
- Water penetration protection of internal components
- NRI Multi-frequency validation technology with new surface measurement
- 3 independant motors, with payout of up to 3 coins simultaneously at up to 6 coins/sec.
- Robust tube cassette, which can be changed even when full
- Cleaning of sorting area possible with easy & fast access
- SIM Card for simple and quick program & currency updates
